Where do I find the AuthInfo/AuthCode ?

To move a domain from EUserv Internet you need the AuthInfo (for DE-domains) or AuthCode (for COM/NET/ORG/INFO/BIN/NAME/EU-domains).

The AuthInfo/AuthCode for the respective domain can be found in the customer center.

Please proceed as follows:

1. Log in to the customer center with your eMail address and password.

2. Select the contract where the domain is kept.

Vertrag	Produkt	Status	
162409	Active .de	fertig 	auswählen

3. Choose the menu point "Co-Domains" from the left menu.

4. There you will find a table of all domains that belong to this contract. If the AuthInfo / AuthCode is enabled it will be displayed there.

Folgende Domains wurden bereits Ihrem Vertrag zugeordnet:

Nr.	Domain	eingrichtet am	AuthCode	Status
1	.de			

Unique solution ID: #1401

Author: EUserv Kundensupport
