Rechnungen

Which benefits does paying my invoices with PayPal offer?

One benefit of paying with PayPal is the option to pay with credit card without being a direct customer of PayPal. That will mean notable savings for customers outside the EU. Furthermore payments through PayPal will be booked immediately – so if your service at EUserv should be in a quarantine state once, it can be reactivated faster by paying via PayPal.

Please note:

You have to select "invoice" as a payment type in the customerpanel in order to pay with PayPal!

EUserv offers the option "pay with PayPal" just if a minimum invoice amount of 10,00 Euro is reached. Please use payment via direct debit, bank transfer or credit card for amounts below 10,00 Euro.

Furthermore you are also able to deposit an amount of arbitrary value to your EUserv customer account, specified with your customer number in the first reference line. If an invoiced amount is due it will be withdrawn from this credit automatically.
