Plesk
Where can I get a Plesk license?

EUserv doesn't offer Plesk licenses for rent. But EUserv provides the opportunity of an automatic Plesk-installation for dedicated servers and VPS. To use these installations an appropriate license has to be procured by a third-party provider.

A license is strictly required for using Plesk. If you don't own a license, please contact a partner of the manufacturer Odin/Parallels. All information and recommended partners can be found on the website of Odin/Parallels.

Generally EUserv suggests to use one of the following alternative webpanels for Plesk:

- Cpanel (fee required)
- ISPconfig
- Froxlor
- EasySCP
- Tekbase (fee required)
