Domain

Will I be charged anything if I file for my domain with EUserv and another provider ?

If a domain is filed for simultaneously with EUserv and another provider by the same person and the domain is registered at the other provider, EUserv, of course, does not raise current domain fees.

setup fees:

Please note that the setup fees for the domain are incurred, even if the domain was registered at another provider.

No charges are incurred when a domain was registered **by another person** at another provider.
