ranaono on to	
Why can I not login into the customer pane	1?

1. An invalid password or customer ID has been entered

• E.g. by inserting the password via copy & paste

(Special characters can possibly get copied with the password)

2. Too many failed login attempts

Possible reasons:

- Wait for the end of the displayed lock period and try again
- Use the "Lost password?" function to have a new password created after the lock period has been suspended
- 3. Your account is deactivated (locked)
 - Please contact our support in writing under support@euserv.com
